

R&C APPALTI
est. 1985

ABOUT

R&C Appalti S.r.l. was founded in 1988 , a few years after the sister company R&C S.r.l., with the intent of working in building renovations and turned into a proper construction company afterwards, employing only the highest qualified and specialised staff who work in the healthcare, oil, military and hotel fields.

The company also consists of a team of specialists who deal with buying, dealing with market research, technical-financial comparisons and contracts, all through direct purchase of raw materials necessary for building. This team provides identification and purchasing of the right furniture, both industrial and artisan, for hospitals, offices, factories, private homes and exhibitions.

R&C APPALTI S.R.L. HAS THE FOLLOWING CERTIFICATIONS:

Attestato SOA n. 52967/17/00 Classifica OG1 V e OG11 I;

Certificazione UNI EN ISO 9001:2015

Certificazione UNI EN ISO 45001:2018

Certificazioni Speciali.

R&C APPALTI S.R.L. CAN PROVIDE THE FOLLOWING:

Complete renovation of hotels and hospitals, including special wards; Mechanical, electrical and hydrothermal systems installations; Order management also at international level as Main Contractor; Maintenance management for real estate complexes.

LUDOVICO CAPPELLANTI

General Manager of Restyling and Consulting group, Ludovico Cappellanti was born in Rome in 1947. He graduated from the Istituto Tecnico per Geometri in the academic year 1967/1968 and started working the same year at a building site in Potenza, with “Salini Costruttori”, working as a surveyor site. He was hired in 1970 by Coming, which has then become Snam Progetti,

In 1970 he was recruited by Coming, then acquired by Snam Progetti, as a building site manager to follow refineries, steel mills and industrial complexes up to 1978, when he moved to the head office to deal with oil plants design and management orders until 1985. In that period of time he was also in charge of the design of an oil plant in Libya and of the research and purchase procedures of all the raw materials needed for construction. In 1985 he left Snam Progetti starting his career as a professional and entrepreneur.

Ludovico is an expert and technical consultant of the court, construction sites health and safety manager, qualified in the field of fire prevention, member of the Chamber of Commerce’s “Ruolo dei Periti ed Esperti” for all building activities, and has been working for both the public sector and large private companies since 1985. In the oil industry he takes care of the standardization of service stations for Agip from design to presentation, he’s in charge of health and safety for Erg at national level, does maintenance and installations for Shell. He manages and supervises large-scale reconstruction and renovation works, he is general manager for the restructuring of the hospital “Italian Hospital Group” as well as technical manager at all stages of the design for various companies involved in healthcare. He is member of “Ingegneria Italiana S.r.l.”, company that works in the field of designing and directing civil, industrial and military works.
